600mm x 1800mm

Bamboo Poster Shelf  
accepts a print  
600mm wide x up to 1800mm tall

Bamboo Roller Banner  
850mm x 2000mm

Bamboo is one of the fastest growing plants in the world. It takes just 3-4 years to grow large enough to be harvested and turned into useful materials.

With climate change, environmental degradation and natural forest reduction becoming a reality, bamboo is becoming the natural replacement for materials such as Aluminum, Glass Fibre, Plastic, Steels and Wood.

Our new 'green' bamboo banner stands have been developed through 20 Months of study to create a product that is not only environmentally friendly but also attractive, durable and hard wearing.

It may surprise you to know that these benefits don't come with a high price-tag, in fact prices are lower than some conventional aluminum systems.

Stands have a unique, natural look and can be supplied complete with printed graphics onto a choice of materials.

All stands are supplied in natural look carry bags
